Funded by  
the European Union

# What You Will Learn

This intensive two-day seminar is designed specifically for carrier representatives, transport inspection officers, compliance specialists, and administrative professionals in the transport sector. Our expert-led sessions will equip you with essential knowledge and practical tools to navigate the complex regulatory landscape of road transport.

## Legal Framework

Comprehensive overview of legal frameworks governing both international and domestic road transport operations, including EU directives.

## Licensing Procedures

Detailed guidance on licensing and authorisation procedures for carriers, ensuring your operations meet all regulatory requirements.

## Documentation Standards

Essential documentation requirements and record-keeping obligations to maintain compliance and streamline administrative processes.

## Compliance Strategies

Learn proven compliance strategies and good administrative practices from experienced professionals across Europe.

## Legislative Updates

Stay informed about recent developments in EU and national transport legislation affecting your operations.

- Language Information:** The working language of the training is English. All multimedia presentations will be displayed in Macedonian to ensure accessibility for all participants.

# About the Twinning Project

## Supporting Inspection Services for Transportation

This training is delivered under the framework of an ambitious EU-funded Twinning Project designed to enhance the compliance and safety of road transport by strengthening the operational and administrative capacities of the State Transport Inspectorate (STI) in North Macedonia.

The project brings together expertise from Poland (Lead Member State) and Croatia (Junior Member State) to support North Macedonia in aligning its regulatory framework with EU legislation and best practices. Through a comprehensive 24-month implementation period, we aim to develop robust tools, methodologies, and operational know-how that will transform transport inspection services.

### Project Reference Details

- Project Title: Supporting the inspection services for transportation of passengers and goods
- Twinning Reference Number: MK 22 IPA TR 01 24
- Duration: 24 months

### Partner Countries

- **Lead Member State:** Republic of Poland
- **Junior Member State:** Republic of Croatia
- **Beneficiary Country:** Republic of North Macedonia

## Project Components and Objectives

01

### Strengthening Regulatory Framework

Aligning the regulatory and organisational framework of STI with EU legislation and international best practices.

02

### Development of Enforcement Tools

Creating comprehensive tools to support the detection, assessment, and enforcement of violations across transport operations.

03

### Operational Know-how Enhancement

Building practical operational capabilities through knowledge transfer, training programmes, and hands-on experience.

The project focuses on enhancing methodologies for planning, performing, and monitoring STI inspection activities, whilst improving operational capacities for conducting both on-the-road and off-the-road inspections. Through this collaborative effort, we aim to create a more efficient, effective, and harmonised transport inspection system.

# Register for the Training

## Secure Your Place

Spaces for this training programme are limited. We encourage you to register early to ensure your participation in this valuable professional development opportunity.

**Registration Deadline:** 26 January 2026

Please complete the registration form to confirm your attendance. Upon registration, you will receive detailed joining instructions, including online access details and programme schedule.
